The Future of Health and Fitness

Tomas Arevalo, Mads Groeholdt, Vincent Hock, Jake Pappo

Evolution

Why current tools don't meet user needs

Data Overload

- A constant need to piece together information, both research-based and personal.

+

Too Generalized

- The diversity of lifestyles requires individualized, rather than generic, advice.

+

Expensive Personalization

- Knowledgeable personal trainers are rare, expensive, and time-consuming.

Limited Tools for Long-Term Progress

Who could use a better solution?

Anyone interested
in health and
fitness!

Goal-oriented

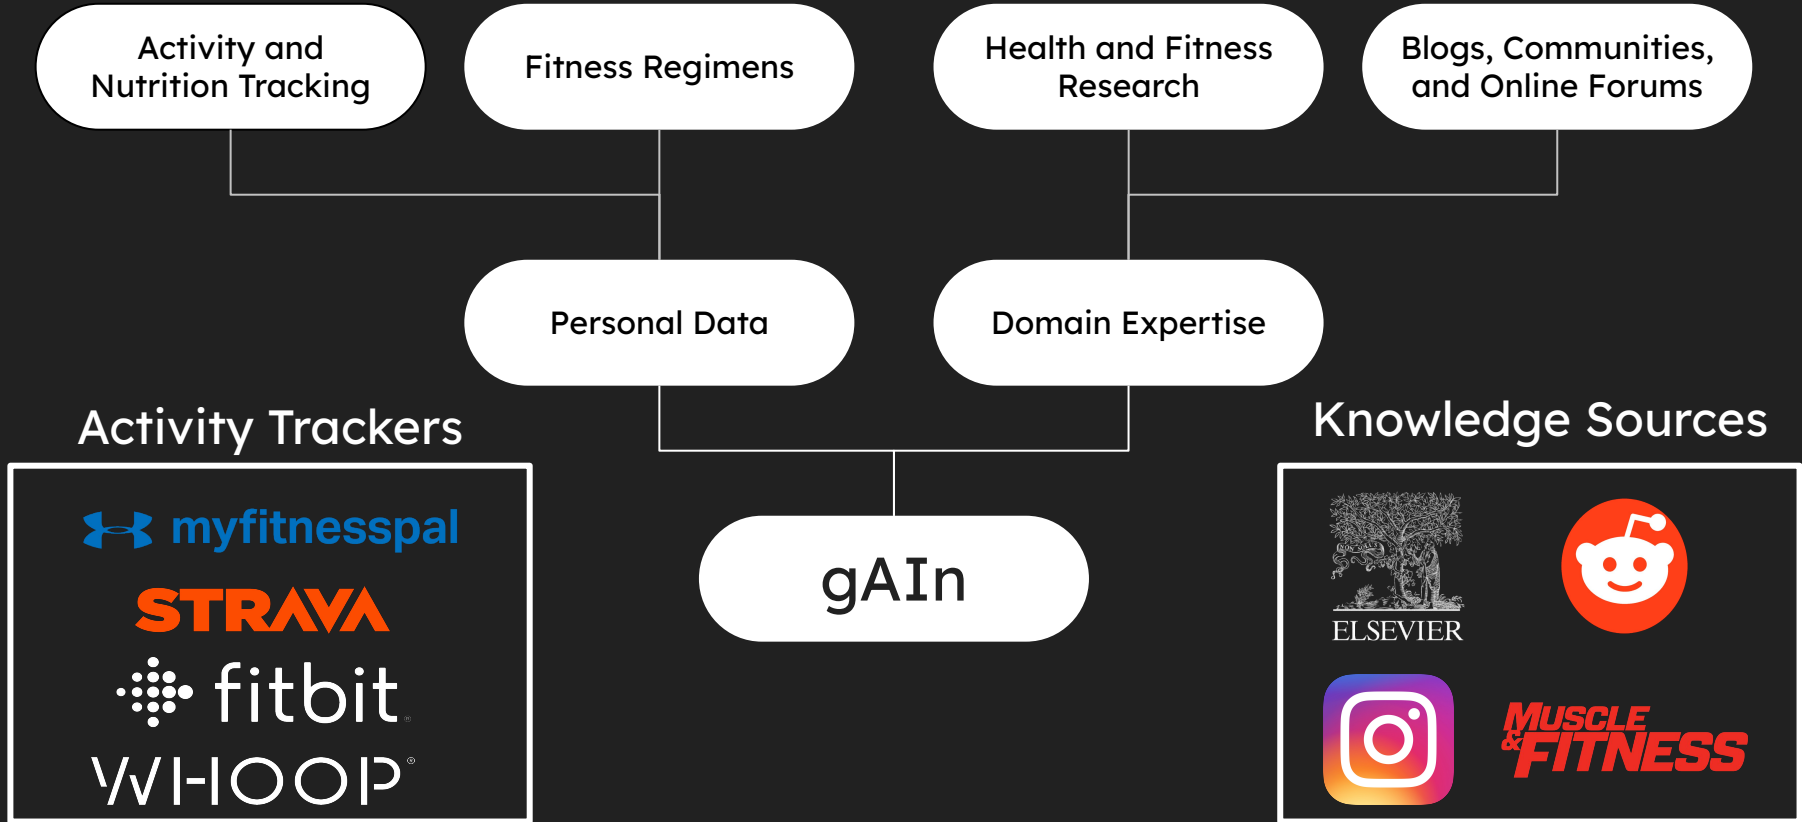

Health-conscious

Busy Professional

No consolidated health and fitness platform

gAIn combines *personal data* and *domain expertise*

gAIn

Interactive, personalized, affordable health and fitness coach

Continuously-updated domain expertise from verified sources

“Perfect recollection” of your health and fitness history

Incumbents

One-size-fits-all apps and overpriced personal trainers

Infinite sources of information with no quality checks

Lack of historical fitness = no personalization

Building an AI assistant *for every user*

Technologies

GCP

Gemini

ChromaDB

Docker

OpenAI

VertexAI

StravaAPI
